

SEVENTY-SIXTH WORLD HEALTH ASSEMBLY

Provisional agenda item 16.1

Well-being and health promotion

May 2023

Reorienting and integrating health systems towards primary care, community and home-based care, public health, and person-centered care is necessary to promote health and wellbeing. Promoting health and well-being is at the core of nursing practice, and as such, nurses are leading transformative changes that are required for integrated person-centered care across the continuum.

ICN calls on governments to fully harness nursing expertise by taking the ten policy actions laid out in ICN's Charter for Change that are necessary to create and sustain health care systems that are safe, affordable, accessible, and responsive and shift nurses from being invisible to invaluable.
