Short excerpts (under 300 words) may be reproduced without authorization, on condition that the source is indicated.

Title: CCC- ICNP Equivalency Table for Nursing Diagnoses

Catalogue Type: Equivalency Table

Publication Date: 2016

Authors:

Amy Coenen, PhD, RN, Director, ICNP® Programme, International Council of Nurses, Geneva, Switzerland

Virginia K. Saba, EdD, RN, CEO and President of SabaCare Inc.

Kay Jansen, DNP, RN, Terminology Manager, ICN eHealth Programme, International Council of Nurses, Geneva, Switzerland

Nicholas Hardiker, PhD, RN, Director, ICN eHealth Programme, International Council of Nurses, Geneva, Switzerland

Tae Youn Kim, PhD, RN, Knowledge Management Director, ICNP® Programme, International Council of Nurses, Geneva, Switzerland

Creation of this catalogue was a group endeavour. Author order does not indicate amount of contribution.

Note: The purpose of this catalogue is to facilitate a) documentation of nursing diagnoses by nurses within the electronic patient record; b) consistent and meaningful communication within the discipline of nursing and across other professions; c) description, comparison and reuse of data worldwide; and d) retrieval of comparable nursing data to evaluate quality of care and to direct policy.

Background: The International Classification for Nursing Practice (ICNP®) is a unified nursing language system that supports the standardisation of nursing documentation at the point of care. The resulting data-based information can be used for planning and managing nursing care, financial forecasting, analysis of patient outcomes and policy development.

A harmonisation agreement between ICN and SabaCare was established in 2012. As part of the larger harmonisation project, a subset of ICNP nursing diagnosis was mapped to Clinical Care Classification (CCC) system. In this project, the CCC (Version 2.5) was the source terminology and the ICNP 2015 Release was the target terminology. Of the 176 CCC nursing diagnoses, a total of 163 were mapped to ICNP diagnostic concepts. With the permission of SabaCare, the resulting equivalency table is published for distribution here as a product of ICN.

ICN and SabaCare, Inc. have partnered to harmonise the International Classification for Nursing Practice (ICNP®) and the Clinical Care Classification (CCC) System, 2012. www.icn.ch/images/stories/documents/news/press_releases/2012_PR_09_ICNP_CCC.pdf

CCC- ICNP Equivalency Table for Nursing Diagnoses

We are excited to present the first product of the collaboration between International Council of Nurses (ICN) and SabaCare that aim to harmonise the International Classification for Nursing Practice (ICNP) and the Clinical Care Classification (CCC) System. It consists of an Equivalency Table of CCC Nursing Diagnoses and ICNP Nursing Diagnoses.

The Collaboration between ICN and SabaCare announced on 20 June 2012 was designed to advance nursing and eHealth. One aim of the partnership was to provide nurses with additional resources and tools to meet their communication and information needs and optimise the use of the Electronic Health Record (EHR). The goal as noted by David Benton, Chief Executive Officer of ICN was “to promote the harmonisation of nursing content within multidisciplinary health care terminologies and across national and international databases and registries of health”.

The Equivalency Table was developed using Version 2.5 CCC Nursing Diagnoses (n = 176) and ICNP 2015 Release Nursing Diagnoses (n = 805). The research and development method used semantic mapping and expert review. The resulting equivalency table provides a semantic match of an ICNP nursing diagnostic concept for each CCC nursing diagnosis/problem, thus 100% of the CCC diagnoses were mapped to an equivalent ICNP concept.

Potential uses of this equivalency table include:

- Facilitating interoperability of CCC and ICNP for data exchange.
- Allowing for comparison of nursing data collected using CCC Diagnoses with those using ICNP to document nursing diagnoses.
- Implementing nursing terminology in EHR: problem lists and care planning.

Both ICNP and CCC provide concepts to represent nursing interventions and outcomes, as well as diagnoses. Thus the work of harmonisation will continue. For further information about CCC, please see: <http://www.sabacare.com/> or <http://www.clinicalcareclassification.com>.

Please contact Amy Amherdt (aamherdt@uwm.edu), Project Administrator for ICN eHealth, to send questions or feedback about the CCC-ICNP Equivalency Table and harmonization project.

CCC Nursing Diagnosis (Version 2.5)	ICNP Nursing Diagnosis (2015 Release)
A. Activity Component:	
Cluster of elements that involve the use of energy in carrying out musculoskeletal and bodily actions	
A01.0 Activity alteration Change in or modification of energy used by the body	*
A01.1 Activity intolerance Incapacity to carry out physiological or psychological daily activities	10000431 Activity Intolerance
A01.2 Activity intolerance risk Increased chance of an incapacity to carry out physiological or psychological daily activities	10015011 Risk For Activity Intolerance
A01.3 Divisional activity deficit Lack of interest or engagement in leisure activities	10040351 Impaired Ability To Perform Leisure Activity
A01.4 Fatigue Exhaustion that interferes with physical and mental activities	10000695 Fatigue
A01.5 Physical mobility impairment Diminished ability to perform independent movement	10001219 Impaired Mobility
A01.6 Sleep pattern disturbance Imbalance in the normal sleep/wake cycle	10027226 Impaired Sleep
A01.7 Sleep deprivation Lack of a normal sleep/wake cycle	10041824 Sleep Deprivation
A02.0 Musculoskeletal alteration Change in or modification of the muscles, bones, or support structures	10022642 Impaired Musculoskeletal System Function
B. Bowel Gastric Component:	
Cluster of elements that involve the gastrointestinal system	
B03.0 Bowel elimination alteration Change in or modification of the gastrointestinal system	10022062 Impaired Defaecation
B03.1 Bowel incontinence Involuntary defecation	10027718 Bowel Incontinence
B03.3 Diarrhea Abnormal frequency and fluidity of feces	10000630 Diarrhoea
B03.4 Fecal impaction Feces wedged in intestines	10021885 Faecal Impaction
B03.5 Perceived constipation Impression of infrequent or difficult passage of hard, dry feces without cause	*
B03.6 Constipation Difficult passage of hard, dry feces	10000567 Constipation
B04.0 Gastrointestinal alteration Change in or modification of the stomach or intestines	10022931 Impaired Gastrointestinal System Function
B04.1 Nausea Distaste for food/fluids and an urge to vomit	10000859 Nausea
B04.2 Vomiting Expulsion of stomach contents through the mouth	10025981 Vomiting
C. Cardiac Component:	
Cluster of elements that involve the heart and blood vessels	
C05.0 Cardiac output alteration Change in or modification of the pumping action of the heart	10025557 Impaired Cardiac Output
C06.0 Cardiovascular alteration Change in or modification of the heart or blood vessels	10022949 Impaired Cardiovascular System
C06.1 Blood pressure alteration Change in or modification of the systolic or diastolic pressure	10022954 Altered Blood Pressure
C06.2 Bleeding risk Increased chance of loss of blood volume	10017268 Risk For Haemorrhaging
D. Cognitive/Neuro Component:	
Cluster of elements involving the cognitive, mental, cerebral, and neurological processes	
D07.0 Cerebral alteration Change in or modification of mental processes	10022321 Impaired Cognition
D07.1 Confusion State of being disoriented (mixed up)	10023633 Confusion
D08.0 Knowledge deficit Lack of information, understanding, or comprehension	10000837 Lack Of Knowledge

CCC Nursing Diagnosis (Version 2.5)	ICNP Nursing Diagnosis (2015 Release)
D08.1 Knowledge deficit of diagnostic test Lack of information on test(s) to identify disease or assess health condition	10021987 Lack Of Knowledge Of Diagnostic Test
D08.2 Knowledge deficit of dietary regimen Lack of information on the prescribed diet/food intake	10021939 Lack Of Knowledge Of Dietary Regime
D08.3 Knowledge deficit of disease process Lack of information on the morbidity, course, or treatment of the health condition	10021994 Lack Of Knowledge Of Disease
D08.4 Knowledge deficit of fluid volume Lack of information on fluid volume intake requirements	10042123 Lack Of Knowledge Of Fluid Regime
D08.5 Knowledge deficit of medication regimen Lack of information on prescribed regulated course of medicinal substances	10021941 Lack Of Knowledge Of Medication Regime
D08.6 Knowledge deficit of safety precautions Lack of information on measures to prevent injury, danger, or loss	10022015 Lack Of Knowledge Of Safety Measure
D08.7 Knowledge deficit of therapeutic regimen Lack of information on regulated course of treating disease	10021925 Lack Of Knowledge Of Treatment Regime
D09.0 Thought process alteration Change in or modification of thought and cognitive processes	10000669 Distorted Thinking Process
D09.1 Memory impairment Diminished ability or inability to recall past events	10001203 Impaired Memory
E. Coping Component: Cluster of elements that involve the ability to deal with responsibilities, problems, or difficulties	
E10.0 Dying process Physical and behavioral responses associated with death	*
E11.0 Family coping impairment Inadequate family response to problems or difficulties	10034789 Impaired Family Coping
E11.2 Disabled family coping Inability of family to function optimally	*
E12.0 Individual coping impairment Inadequate personal response to problems or difficulties	10001120 Difficulty Coping
E12.1 Adjustment impairment Inadequate adjustment to condition or change in health status	10000863 Impaired Adjustment
E12.2 Decisional conflict Struggle related to determining a course of action	10000579 Decisional Conflict
E12.3 Defensive coping Self-protective strategies to guard against threats to self	*
E12.4 Denial Attempt to reduce anxiety by refusal to accept thoughts, feelings, or facts	10000624 Denial
E13.0 Post-trauma response Sustained behavior related to a traumatic event	10001699 Post Trauma Response
E13.1 Rape trauma syndrome Group of symptoms related to a forced sexual act	10001597 Rape Trauma Response
E14.0 Spiritual state alteration Change in or modification of the spirit or soul	10023336 Impaired Spiritual Status
E14.1 Spiritual distress Anguish related to the spirit or soul	10001652 Spiritual Distress
E52.0 Community coping impairment Inadequate community response to problems or difficulties	10034817 Impaired Community Coping
E53.0 Grieving Feeling of great sorrow	10022345 Grief
E53.1 Anticipatory grieving Feeling great sorrow before the event or loss	10000726 Anticipatory Grief
E53.2 Dysfunctional grieving Prolonged feeling of great sorrow	10001183 Dysfunctional Grief
F. Fluid Volume Component: Cluster of elements that involve liquid consumption	
F15.0 Fluid volume alteration Change in or modification of bodily fluid	*
F15.1 Fluid volume deficit Dehydration or fluid loss	10042020 Hypovolaemia

CCC Nursing Diagnosis (Version 2.5)		ICNP Nursing Diagnosis (2015 Release)
F15.2 Fluid volume deficit risk Increased chance of dehydration or fluid loss		10042049 Risk For Hypovolaemia
F15.3 Fluid volume excess Fluid retention, overload, or edema		10042012 Hypervolaemia
F15.4 Fluid volume excess risk Increased chance of fluid retention, overload, or edema		10042031 Risk For Hypervolaemia
F62.0 Electrolyte imbalance Higher or lower body electrolyte levels		10033541 Electrolyte Imbalance
G. Health Behavior Component: Cluster of elements that involve actions to sustain, maintain, or regain health		
G17.0 Health maintenance alteration Change in or modification of ability to manage health-related needs		10000918 Impaired Health Maintenance
G17.1 Failure to thrive Inability to grow and develop normally		10022898 Failure To Thrive
G18.0 Health-seeking behavior alteration Change in or modification of actions needed to improve health state		10022920 Impaired Health Seeking Behaviour
G19.0 Home maintenance alteration Inability to sustain a safe, healthy environment		10000925 Impaired Homemaking
G20.0 Noncompliance Failure to follow therapeutic recommendations		10001371 Non Adherence
G20.1 Noncompliance with diagnostic test Failure to follow therapeutic recommendations on tests to identify disease or assess health condition		10022101 Non Adherence To Diagnostic Testing Regime
G20.2 Noncompliance with dietary regimen Failure to follow the prescribed diet/food intake		10022117 Non Adherence To Dietary Regime
G20.3 Noncompliance of fluid volume Failure to follow fluid volume intake requirements		10022129 Non Adherence To Fluid Regime
G20.4 Noncompliance of medication regimen Failure to follow prescribed regulated course of medicinal substances		10021682 Non Adherence To Medication Regime
G20.5 Noncompliance with safety precautions Failure to follow measures to prevent injury, danger, or loss		10022140 Non Adherence To Safety Regime
G20.6 Noncompliance with therapeutic regimen Failure to follow regulated course of treating disease or health condition		10022155 Non Adherence To Therapeutic Regime
H. Medication Component: Cluster of elements that involve medicinal substances		
H21.0 Medication risk Increased chance of negative response to medicinal substances		*
H21.1 Polypharmacy Use of two or more drugs together		10030042 Polypharmacy
I. Metabolic Component: Cluster of elements that involve the endocrine and immunologic processes		
I22.0 Endocrine alteration Change in or modification of internal secretions or hormones		10022965 Impaired Endocrine System Function
I23.0 Immunologic alteration Change in or modification of the immune system		10041103 Immunologic Impairment
J. Nutritional Component: Cluster of elements that involve the intake of food and nutrients		
J24.0 Nutrition alteration Change in or modification of food and nutrients		10023009 Impaired Nutritional Intake
J24.1 Body nutrition deficit Less than adequate intake or absorption of food or nutrients		10000607 Deficient Food Intake
J24.2 Body nutrition deficit risk Increased chance of less than adequate intake or absorption of food or nutrients		10025561 Risk For Nutritional Deficit
J24.3 Body nutrition excess More than adequate intake or absorption of food or nutrients		10000682 Excess Food Intake
J24.4 Body nutrition excess risk		10015114 Risk For Excess Food Intake

CCC Nursing Diagnosis (Version 2.5)	ICNP Nursing Diagnosis (2015 Release)
Increased chance of more than adequate intake or absorption of food or nutrients	
J24.5 Swallowing impairment Inability to move food from mouth to stomach	10001033 Impaired Swallowing
J54.0 Infant feeding pattern impairment Imbalance in the normal feeding habits of an infant	10001196 Impaired Infant Feeding Behaviour
J55.0 Breastfeeding impairment Diminished ability to nourish infant at the breast	10001098 Difficulty Performing Breastfeeding
K. Physical Regulation Component:	
Cluster of elements that involve bodily processes	
K25.0 Physical regulation alteration Change in or modification of somatic control	10023358 Impaired Regulatory System Function
K25.1 Autonomic alteration Life-threatening inhibited sympathetic response to noxious stimuli in a person with a spinal cord injury at or above T7	10000496 Autonomic Dysreflexia
K25.2 Hyperthermia Abnormally high body temperature	10000757 Hyperthermia
K25.3 Hypothermia Abnormally low body temperature	10000761 Hypothermia
K25.4 Thermoregulation impairment Fluctuation of temperature between hypothermia and hyperthermia	10033560 Impaired Thermoregulation
K25.5 Infection risk Increased chance of contamination with disease-producing germs	10015133 Risk For Infection
K25.6 Infection Contamination with disease-producing germs	10023032 Infection
K25.7 Intracranial adaptive capacity impairment Intracranial fluid volumes are compromised	10000828 Decreased Intracranial Adaptive Capacity
L. Respiratory Component:	
Cluster of elements that involve breathing and the pulmonary system	
L26.0 Respiration alteration Change in or modification of the breathing function	10023362 Impaired Respiratory System Function
L26.1 Airway clearance impairment Inability to clear secretions/obstructions in airway	10001051 Impaired Airway Clearance
L26.2 Breathing pattern impairment Inadequate inhalation or exhalation	10001316 Impaired Breathing
L26.3 Gas exchange impairment Imbalance of oxygen and carbon dioxide transfer between lung and vascular system	10001177 Impaired Gas Exchange
L56.0 Ventilatory weaning incontinence Inability to tolerate decreased levels of ventilator support	10001261 Impaired Ventilatory Weaning
M. Role Relationship Component:	
Cluster of elements involving interpersonal work, social, family, and sexual interactions	
M27.0 Role performance alteration Change in or modification of carrying out responsibilities	10000941 Impaired Role Performance
M27.1 Parental role conflict Struggle with parental position and responsibilities	10001385 Parental Stress
M27.2 Parenting alteration Change in or modification of nurturing figure's ability to promote growth	10000939 Impaired Parenting
M27.3 Sexual dysfunction Deleterious change in sexual response	10001288 Impaired Sexual Functioning
M27.4 Caregiver role strain Excessive tension of one who gives physical or emotional care and support to another person or patient	10027773 Caregiver Stress
M28.0 Communication impairment Diminished ability to exchange thoughts, opinions, or information	10023370 Impaired Communication
M28.1 Verbal impairment Diminished ability to exchange thoughts, opinions, or information through speech	10025104 Impaired Verbal Communication
M29.0 Family process alteration Change in or modification of usual functioning of a related group	10023078 Impaired Family Process
M31.0 Sexuality patterns alteration	10001274 Problematic Sexual Behaviour

CCC Nursing Diagnosis (Version 2.5)	ICNP Nursing Diagnosis (2015 Release)
Change in or modification of a person's sexual response	
M32.0 Socialization alteration Change in or modification of personal identity	*
M32.1 Social interaction alteration Change in or modification of inadequate quantity or quality of personal relations	10001022 Impaired Socialisation
M32.2 Social isolation State of aloneness, lack of interaction with others	10001647 Social Isolation
M32.3 Relocation stretch syndrome Excessive tension from moving to a new location	10021788 Relocation Stress
N. Safety Component: Cluster of elements that involve prevention of injury, danger, loss, or abuse	
N33.0 Injury risk Increased chance of danger or loss	10015146 Risk For Injury
N33.1 Aspiration risk Increased chance of material into trachea-bronchial passage.	10015024 Risk For Aspiration
N33.2 Disuse syndrome Group of symptoms related to effects of immobility	10023097 Disuse Syndrome
N33.3 Poisoning risk Exposure to or ingestion of dangerous products	10015271 Risk For Poisoning
N33.4 Suffocation risk Increased chance of inadequate air for breathing	10015341 Risk For Suffocation
N33.5 Trauma risk Increased chance of accidental tissue processes	10015360 Risk For Trauma
N33.6 Fall risk Increased chance of conditions that result in falls	10015122 Risk For Fall
N34.0 Violence risk Increased chance of harming self or others	10022487 Risk For Violence
N34.1 Suicide risk Increased chance of taking one's life intentionally	10015356 Risk For Suicide
N34.2 Self mutilation risk Increased chance of destroying a limb or essential part of the body	10015318 Risk For Self Mutilation
N57.0 Perioperative injury risk Increased chance of injury during the operative processes	10023107 Risk For Perioperative Injury
N57.1 Perioperative positioning injury Damages from operative process positioning	10023111 Perioperative Positioning Injury
N57.2 Surgical recovery delay Slow or delayed recovery from a surgical procedure	10037426 Delayed Surgical Recovery
N58.0 Substance abuse Excessive use of harmful bodily materials	10022268 Substance Abuse
N58.1 Tobacco abuse Excessive use of tobacco products	10022247 Tobacco Abuse
N58.2 Alcohol abuse Excessive use of distilled liquors	10022234 Alcohol Abuse
N58.3 Drug abuse Excessive use of habit-forming medications	10022425 Drug Abuse
O. Self-Care Component: Cluster of elements that involve the ability to carry out activities to maintain oneself	
O35.0 Bathing/hygiene deficit Impaired ability to cleanse oneself	10000956 Impaired Ability To Bath
O36.0 Dressing/grooming deficit Inability to clothe and groom oneself	10000960 Impaired Dressing And Grooming
O37.0 Feeding deficit Impaired ability to feed oneself	10000973 Impaired Self Feeding
O38.0 Self-care deficit Impaired ability to maintain oneself	10023410 Self Care Deficit
O38.1 Activities of daily living (adls) alteration Change in or modification of ability to maintain oneself	*
O38.2 Instrumental activity of daily living (iadls) alteration Change in or modification of more complex activities than those needed to maintain oneself	*
O39.0 Toileting deficit	10000994 Impaired Self Toileting

CCC Nursing Diagnosis (Version 2.5)	ICNP Nursing Diagnosis (2015 Release)
Impaired ability to urinate or defecate for oneself	
P. Self-Concept Component:	
Cluster of elements that involve an individual's mental image of oneself	
P40.0 Anxiety Feeling of distress or apprehension whose source is unknown	10000477 Anxiety
P41.0 Fear Feeling of dread or distress whose cause can be identified	10000703 Fear
P42.0 Meaningfulness alteration Change in or modification of the ability to see the significance, purpose, or value in something	10023423 Lack Of Meaning
P42.1 Hopelessness Feeling of despair or futility and passive involvement	10000742 Hopelessness
P42.2 Powerlessness Feeling of helplessness or inability to act	10001578 Powerlessness
P43.0 Self-concept alteration Change in or modification of ability to maintain one's image of self	10022724 Negative Self Image
P43.1 Body image disturbance Imbalance in the perception of the way one's body looks	10001079 Disturbed Body Image
P43.2 Personal identity disturbance Imbalance in the ability to distinguish between the self and the nonself	10001257 Disturbed Personal Identity
P43.3 Chronic low self-esteem disturbance Persistent negative evaluation of oneself	10000533 Chronic Low Self Esteem
P43.4 Situational self-esteem disturbance Negative evaluation of oneself in response to a loss or change	10000844 Situational Low Self Esteem
Q. Sensory Component:	
Cluster of elements that involve the senses, including pain	
Q44.0 Sensory perceptual alteration Change in or modification of the response to stimuli	10001242 Altered Perception
Q44.1 Auditory alteration Change in or modification of diminished ability to hear	10022544 Impaired Hearing
Q44.2 Gustatory alteration Change in or modification of diminished ability to taste	10022814 Impaired Sense Of Taste
Q44.3 Kinesthetic alteration Change in or modification of diminished balance	*
Q44.4 Olfactory alteration Change in or modification of diminished ability to smell	10022528 Impaired Sense Of Smell
Q44.5 Tactile alteration Change in or modification of diminished ability to feel	10022619 Impaired Tactile Perception
Q44.6 Unilateral neglect Lack of awareness of one side of the body	10033573 Unilateral Neglect
Q44.7 Visual alteration Change in or modification of diminished ability to see	10022748 Impaired Vision
Q45.0 Comfort alteration Change in or modification of sensation that is distressing	10023066 Discomfort
Q63.0 Pain Physical suffering or distress; to hurt	*
Q63.1 Acute pain Severe pain of limited duration	10000454 Acute Pain
Q63.2 Chronic pain Pain that persists over time	10000546 Chronic Pain
R. Skin Integrity Component:	
Cluster of elements that involve the mucous membrane, corneal, integumentary, or subcutaneous structures of the body	
R46.0 Skin integrity alteration Change in or modification of skin conditions	*
R46.1 Oral mucous membranes impairment Diminished ability to maintain the tissues of the oral cavity	10026967 Impaired Oral Mucous Membrane
R46.2 Skin integrity impairment Decreased ability to maintain the integument	10001290 Impaired Skin Integrity
R46.3 Skin integrity impairment risk Increased chance of skin breakdown	10015237 Risk For Impaired Skin Integrity

CCC Nursing Diagnosis (Version 2.5)	ICNP Nursing Diagnosis (2015 Release)
R46.4 Skin incision Cutting of the integument/skin	10023148 Surgical Wound
R46.5 Latex allergy response Pathological reaction to latex products	10000790 Latex Allergy
R47.0 Peripheral alteration Change in or modification of neurovascularization of the extremities	10023153 Impaired Peripheral Neurovascular Function
S. Tissue Perfusion Component: Cluster of elements that involve the oxygenation of tissues, including the circulatory and vascular systems	
S48.0 Tissue perfusion alteration Change in or modification of the oxygenation of tissues	10001344 Ineffective Tissue Perfusion
T. Urinary Elimination Component: Cluster of elements that involve the genitourinary systems	
T49.0 Urinary elimination alteration Change in or modification of excretion of the waste matter of the kidneys	10001359 Impaired Urinary System Function
T49.1 Functional urinary incontinence Involuntary, unpredictable passage of urine	10026778 Functional Incontinence Of Urine
T49.2 Reflex urinary incontinence Involuntary passage of urine occurring at predictable intervals	10026784 Reflex Incontinence Of Urine
T49.3 Stress urinary incontinence Loss of urine occurring with increased abdominal pressure	10026797 Stress Incontinence Of Urine
T49.5 Urge urinary incontinence Involuntary passage of urine following a sense of urgency to void	10026811 Urge Incontinence Of Urine
T49.6 Urinary retention Incomplete emptying of the bladder	10034654 Urinary Retention
T50.0 Renal alteration Change in or modification of kidney function	10023169 Impaired Kidney Function
U. Life Cycle Component: Cluster of elements that involve the life span of individuals	
U59.0 Reproductive risk Increased chance of harm in the process of replicating or giving rise to an offspring/child	10023176 Risk For Impaired Reproductive Function
U59.1 Fertility risk Increased chance of conception to develop an offspring/child	10023182 Risk For Unintended Pregnancy
U59.2 Infertility risk Decreased chance of conception to develop an offspring/child	10045328 Risk For Infertility
U59.3 Contraception risk Increased chance of harm preventing the conception of an offspring/child	10023202 Risk For Complication With Contraception Use
U60.0 Perinatal risk Increased chance of harm before, during, and immediately after the creation of an offspring/child	10023218 Risk For Complications Related To Childbirth
U60.1 Pregnancy risk Increased chance of harm during the gestational period of the formation of an offspring/child	10023225 Risk For Complications During Pregnancy
U60.2 Labor risk Increased chance of harm during the period supporting the bringing forth of an offspring/child	10023239 Risk For Complications During Labour
U60.3 Delivery risk Increased chance of harm during the period supporting the expulsion of an offspring/child	10023241 Risk For Complications During Child Delivery
U60.4 Postpartum risk Increased chance of harm during the period immediately following the delivery of an offspring/child	10023256 Risk For Complications Postpartum
U61.0 Growth & development alteration Change in or modification of age-specific normal growth standards and/or developmental skills	10023260 Impaired Human Development

* No corresponding concept is available in the ICNP 2015 release.
