Title: Community Nursing

Catalogue Type: Nursing Minimum Data Set

Publication Date: 2011, Updated 2013, Updated 2015, Updated 2017

Authors:

Claudia C. Bartz, PhD, RN, Coordinator, ICN eHealth Programme, International Council of Nurses, Geneva, Switzerland

Amy Coenen, PhD, RN, Director, ICNP® Programme, International Council of Nurses, Geneva, Switzerland

Nicholas Hardiker, PhD, RN, Director, ICN eHealth Programme, International Council of Nurses, Geneva, Switzerland

Kay Jansen, DNP, RN, Terminology Manager, ICNP® Programme, International Council of Nurses, Geneva, Switzerland

Tae Youn Kim, PhD, RN, Knowledge Management Director, ICNP® Programme, International Council of Nurses, Geneva, Switzerland

Heather Strachan, RGN, Dip N, MSc, FBCS, Clinical Lead, Care Governance, Scottish Government (previously eHealth Clinical Lead (NMAHP) eHealth Scottish Government)

Alison Wallis, RGN, District Nurse Cert., BSc, MSc, eHealth Nurse Adviser, Royal College of Nursing, UK (previously Clinical Adviser, Information Services Division, NHS National Services Scotland)

Creation of this catalogue was a group endeavour. Author order does not indicate amount of contribution.

Expert Reviewers:

Elaine Allan, Lead Nurse, School Nursing, NHS Grampian

Catriona Kellock, District Nurse Team Leader, NHS Forth Valley

Lorraine McLean, School Nurse, NHS Lothian

Eleanor Morrison, Health Visitor, NHS Lothian

Kristina Mountain, Nurse Lecturer, Queen Margaret University, Edinburgh

Sheila Shaw, District Nurse, NHS Lothian

Note: The purposes of this catalogue are to facilitate a) documentation of nursing practice by community nurses within the electronic patient record; b) consistent and meaningful communication within the discipline of nursing and across other professions; c) articulation of community nursing practice; d) description, comparison and reuse of data by community nurses in Scotland and other countries; and e) retrieval of comparable nursing data to evaluate quality of care and to direct policy. The clients for community health nursing include patients, families and groups in the community. This ICNP® catalogue focuses specifically on the health priority of community health, a nursing service and specialty of importance worldwide. This catalogue is based on practice in Scotland by nurses in the National Health Service.

Background: The International Classification for Nursing Practice (ICNP®) is a unified nursing language system that supports the standardisation of nursing documentation at the point of care. The resulting data-based information can be used for planning and managing nursing care, financial forecasting, analysis of patient outcomes and policy development. The ICNP Strategic Advisory Group and many other expert nurses involved with ICNP have recognised that manageable subsets of the terminology should be available to nurses working with patients or clients in selected specialties and settings.

The purpose of a catalogue is to make ICNP a useful tool for nurses at the point of care. Catalogues are subsets of ICNP that allow nurses to more readily integrate ICNP into their practice as they work in a specialty area or with clients having specific health conditions or needs.

Catalogues do not replace the clinical judgement of the nurse. Nurses can use Catalogues as reference tools for documenting care and reflecting on their practice. Nurses' clinical judgement and decision-making are essential for individualised care of patients and their families and cannot be replaced by any tool.
