Migration: Applying a Multi-Focal Policy  
Lens on the Nursing Profession

- A multifocal lens:
  - Socio-Economic & Political dynamics
  - Health workforce planning
  - International relations policy & global health
- What do we do as the organised profession?
- Living up to the challenge

- Maintenance of global nursing standards through harmonisation learning outcomes and recognition of qualifications
- Investment in leadership development of nurses to impact on health & other socioeconomic policies
- Move away from migration being about headcounts – push for harmonisation of nursing's role in global health issues
